ISSUED: JULY 12, 2013

EFFECTIVE: JULY 12, 2013

LAS VEGAS TRACON LETTER TO AIRMEN NO. #13-02

SUBJECT: Las Vegas departure procedure changes.

CANCELLATION: July 12, 2014

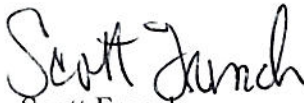

Effective July 12, LAS ATCT is limiting departures from RWY 19L/R as a normal procedure at McCarran International Airport. This action is being taken as a result of identified operational issues between aircraft departing RWY 19L/R and go-around traffic from the RWY 25L/R complex.

Operators should plan on departing the RWY 25R in lieu of RWY 19L/R.

FAA is requesting that general aviation operators filing over the TRALR waypoint utilize the STAAV FOUR Departure in lieu of the LAS VEGAS THREE Departure. This will put all aircraft filed over TRALR on the same RNAV route which affords consistent traffic flows. In the event that an aircraft is unable to fly the STAAV FOUR Departure, the Tower should be advised and the appropriate departure procedure will be assigned.

These interim procedures are designed to enhance safety during the development and implementation of processes that will mitigate the instances of these events.

If you have questions or need more information please contact LAS ATCT at 702-262-5975.
